#### Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the text!

#### Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

# Seven essential steps for planning a camping trip

Thinking about treating yourself to a camping trip? This type of vacation requires a bit of organization; if you take note of the following steps, you'll have better chances of things running smoothly.

**1. Decide what type of camping you like.** Do you like sleeping under the stars with wilderness camping? Spending your nights in a hut? Enjoying the comforts of a camper?

**2. Choose your campground.** Look into the ratings of the different campgrounds in the area you're planning to visit. Find out which facilities and services are available; is there a children's playground, swimming pool, tennis courts, laundry or Internet access? Check out some tourism blogs and read previous campers' reviews on campground websites.

**3. Reserve now.** The best sites—usually the ones closest to the restrooms and shorelines—go fast.

**4. Make sure you have the necessary equipment.** Tarpaulin, headlamp, first-aid kit, kitchen accessories and cooler—depending on your type of camping, the equipment needed will vary. You should be able to carry everything, so think twice about cumbersome

or unnecessary objects.

**5. Double-check your equipment.** Whether it's new or used, make sure your equipment is in good condition so as to avoid unpleasant surprises when you're setting up the campsite.

**6. Plan your meals.** Prepare in advance some meals that can be reheated on-site. Plan

a few meals that don't need to be cooked as well. Visit some camping blogs to get recipe ideas and then buy the necessary groceries.

**7. Check the weather forecast.** This will allow you to plan weather-appropriate activities and pack suitable clothing.

Ready to go? Have a great vacation!

## Pools and spas equal pleasure and relaxation

Some of us are pool people and some are spa people; others are a bit of both. But, whichever group you belong to, there's nothing quite like a splendid summer day for spending time in the water, having fun or just lazing around.

Ah, the pool: source of a thousand small pleasures and a delicious, blissful coolness on a hot, sunny day. Sure, the family swimming pool is the children's favorite playground - or maybe even the whole neighborhood's - but it's also a great place to exercise. There's nothing to stop you from indulging in an aqua-fitness session in the morning and a romantic swim at midnight. In addition, the pool allows children to learn how to swim. And what would you do without a pool during family barbecues?

And the spa? What a great place for animated conversations. It's so comfortable and relaxing, especially when the evenings are a bit cooler. And don't forget that the therapeutic benefits of spas are a proven fact. You'd like to enjoy the advantages of a pool as well as the benefits of a spa? A swim spa lets you exercise by swimming against a current, offering you the best of both worlds and at a better price than buying one of each.

## Rose Garden Antiques

*15801 E. St. Rd. 46, Columbus, Indiana*

#### Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the text!

#### Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

# Time for another ROAD TRIP

## How to plan a road trip

Having an itinerary is a valuable tool during a road trip. Far from tying you down, it will let you make the most of your time and help you quickly reorganize when unforeseen circumstances pop up - which is pretty much inevitable during any kind of trip.

When planning your route, consult travel guides, tourist guides and maps. These are useful for visualizing the route, and they may even save the day if your GPS decides to go on strike. Study the guides to identify all the interesting attractions and locate them on the map. Remember that the important thing is not to see everything, but to see a little of everything that interests you. Don't forget to set aside some time for rest and relaxation.

The next step is to check what is achievable in terms of mileage, time and budget. Calculate the distance between your stops and how long it will take to get to your destination. Think about how many hours a day you want to devote to driving, especially if you want to avoid

night driving. To help you plan everything, draw up a calendar and note your scheduled visits for each day and the time they'll require. Then note the distance to cover and your departure and arrival points.

Before finalizing your route, check the opening times of the places you want to visit. Find out what you can about any festivals or special events that you'd like to attend or avoid because of crowds and higher prices. Lastly, make sure there are places to stay at all your arrival points, and then book in advance. This will save you a lot of hassle. Have a great vacation!

## Road trip tips to save you money

**Save on meals and accommodation:** bring a cooler and making some sandwiches and salads for your meals. If you sleep at a hotel, ask for a room with a kitchenette. Keep in mind that campgrounds and youth hostels are preferable to hotels if you really want to save money.

**Save on gas:** Traveling light is key; overloading the car with unnecessary luggage will

increase your fuel consumption. Stick to the speed limit to save on gas. Use an app on your smartphone to find the cheapest gas station around you, and fill up before arriving in big cities, where gas is often more expensive.

**Take advantage of free activities:** Look for free activities along your route: check for festivals, beaches and parks.

## Games for passing the time while driving

Are you looking for games, other than electronic ones, to entertain everyone during the long hours of your road trip? Here are some ideas.

- The alphabet. Be the first person to spot the 26 letters of the alphabet in order on signs, license plates, shops, etc..
- Categories. Choose a category. Everyone then names a word beginning with "A" until they run out of ideas, at which time you move on to the letter "B."
- Celebrities. Choose a first name (John),

then think of a celebrity who has that name (Lennon, Kennedy, Travolta, etc.). Players who can't think of one are eliminated.

• From 1 to 100. Each player chooses a different color or make of car. The first to see 100 of their choice wins.

• The suitcase. I'm going on vacation and I put in my suitcase a... . Each player in turn adds an object to the suitcase, after repeating all previously added objects. Variation: complicate matters by playing in alphabetical order (coat, hat, money, etc.).

• Geography 101. Designate a theme (capital cities) and a first example (Paris). Each player must find a name that begins with the last letter of the previous one, and so on (Paris, Stockholm, Madrid, Dublin, etc.).

You can also play guessing games, read signs with funny accents, find rhymes or logical sequences (garden, flowers, leaf, table, chair, etc.), rewrite song lyrics or form words with the letters on license plates (DAF = Daffodil). In short, be creative and have fun.

#### Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the text!

#### Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

7	6	2	8	5	4	3	1	9
3	1	4	9	2	6	8	7	5
5	9	8	1	7	3	6	4	2
4	8	3	5	6	9	1	2	7
9	5	6	7	1	2	4	3	8
2	7	1	3	4	8	6	5	9
1	4	9	2	8	7	5	6	3
6	3	7	4	9	5	2	8	1
8	2	5	6	3	1	7	9	4

# Family activities for a fun-filled summer

Are you running out of ideas for entertaining your family this summer? Here are a few that may well inspire you and give you and your children a summer to remember.

## *Learn more about the animal kingdom*

There are lots of places to visit that will allow you to get up close and learn more about small and large animals from here and around the world. Maybe you can even discover a few from the past - mammoths and dinosaurs are always fascinating. Aquariums, zoos, insectariums, interpretation centers and museums will impress the whole family. Hiking is also a great way to meet lots of furry and feathered animals. And what about boat trips that give you the opportunity to see some marine animals up close?

## *Some culture, perhaps?*

Science, the arts, history and culture: whatever interests your family has, you'll definitely find something for everyone at the exhibitions, shows and festivals that are put on during the summer months. So, would you like to watch the stars, spend a day in a 19th century village, admire some modern art or watch a puppet show?

## *Discover some local flavors*

Discovering how cheese, honey or chocolate is made or visiting a farm offering local produce or pick-your-own fruit are just some of the many fun and yummy activities you can do. And with the many agritourist circuits now on offer, planning a gourmet itinerary has never been so easy. Enjoy!

## Three good reasons to go fishing

There's nothing quite like a fishing expedition. Experts and beginners never tire of this sport because there are so many good reasons to go fishing. Here are three that might help you finally convince your family to go with you.

### **1. Spend time with people you love**

Fishing trips are a great way to strengthen ties with family or friends. It's a great way to share your passion with those you love and teach them everything you know. And if you take your children fishing, it will be a real joy to see the expression on their faces when they land their first catch.

### **2. Relax in nature**

Forget tight schedules, traffic jams and daily stress; fishing lets you relax, far from the hustle and bustle of the city. The country is a great place to recharge your batteries by getting outdoors and into the sun and fresh air.

### **3. The ultimate treat**

Do you love to cook and eat fish? You won't find anything fresher and tastier than fish caught the same day.

Treating yourself to a fishing trip is all about pleasure. It's the pleasure of learning or improving your techniques, the relief of escaping your daily routine and, of course, the fun of landing some prize catches - especially when it's the biggest catch of the day.
